

DESIGN PRACTICUM 2019

Final Idea submission 2019 -

Project Details

Team No: 6

Project Title: RAKSHAK

One Line description of your project: Unmanned surveillance rover for border security

100 words description of your project: An unmanned rover for surveillance along border for security purpose using camera and various sensors to reduce casualties of army personnel. It reduces the risk of life of soldiers. This rover will be controlled by a person who will be there in control centre and data will be transferred to command control centre by using local network. This rover will detect land mines, any intrusion through camera irrespective of day and night. "Life of a soldier is worth much much more than money".
